Blog Post	“CBD FOR SLEEP: BEATING INSOMNIA THE NATURAL WAY,”	<p>“Can CBD Help with sleep apnea? . . . In some areas, like sleep apnea, we have to rely on anecdotal evidence and our own reasoning” with the words “anecdotal evidence” hyperlinked to an article, “Finding a Natural Remedy for Sleep Apnea.” The article, “Finding a Natural Remedy for Sleep Apnea” includes statement such as, but not limited to:</p> <ul style="list-style-type: none"> o “CBD for sleep apnea . . . helped both my husband and me get better sleep at night.”
Testimonials		<p>“There’s so much more we’d love to say about the soothing, calming effects of CBD, but we can’t make any “claims” about the actual benefits of CBD (as instructed by the FDA). Fortunately, anecdotal evidence of its effectiveness is everywhere. Take a look at our customer reviews to see what other folks have experienced” with the words “customer reviews” hyperlinked to a page titled “CBDFX VERIFIED PRODUCT REVIEWS.” The CBDFX VERIFIED PRODUCT REVIEWS webpage includes testimonials, but not limited to, the following:</p> <ul style="list-style-type: none"> o “Awesome pain relief!” o “Eases my back pain.”
Blog Post	“Can Cannabis Compounds Help Protect Against COVID-19 Infection?”	<p>“A recent study from Oregon State describes how certain cannabinoids latch onto the Covid-19 protein, creating spikes that prevent it from entering cells . . . Cannabinoid acids CBGA and CBDA are the two cannabinoids featured in the Oregon State study . . . that’s why the combination of the two has been a focus of many of our wellness products.”</p>
Blog Post	“4 Natural Ways to Beat Depression”	<p>“Nature supplies plenty of natural remedies, such as . . . CBD, to beat depression.”</p>
Blog Post	“CBD for Stress”	<p>“[W]e can share other reports, including this 2015 report, which found evidence that ‘established CBD as an effective treatment for numerous types of anxiety disorders, including generalized anxiety disorder (GAD), posttraumatic stress disorder (PTSD), panic disorder (PD), obsessive-compulsive disorder (OCD), and social anxiety disorder (SAD). In fact, this same article quotes multiple studies which showed CBD as effective when used for anxiety.”</p>
Blog Post	“CBD for Stress”	<p>“[T]his study in Neurotherapeutics, states that ‘preclinical evidence conclusively demonstrates CBD’s efficacy in reducing anxiety behaviors relevant to multiple disorders, including PTSD, GAD, PD, OCD, and SAD.’”</p>
Blog Post	“Is CBD Oil Safe for Long-Term Use?”	<p>“Tests performed on mice show CBD helping to reduce acute anxiety . . . and even reduced symptoms that can lead to dementia and Alzheimer’s.”</p>

Product	CBD Cream For Muscle & Joint	"CBD Cream For Muscle & Joint: Cooling Formula 1000-3000mgmg . . . Broad spectrum CBD . . . Proven natural pain relievers, white willow bark & caffeine . . . Menthol for cool, long-lasting pain relief"
Product	CBD Cream For Muscle & Joint	"Dr. Sahin Yanik . . . MEDICALLY REVIEWED . . . CBD Cream for Muscle and Joint: Cooling Formula from CBDfx is a great water-based cream for aches and pains in muscles, joints and other deep tissue . . . I like the ingredient profile, which is a nice mix of organic broad spectrum CBD, natural pain relievers white willow bark and caffeine, and menthol. We all know about CBD's effectiveness, as it interacts with the body's endocannabinoid system . . . I used the 3000mg cream, which was incredibly effective . . . Blog Post	Best CBD Oil for Stress & Depression: Can CBD Oil Help?	“The pre-clinical data support the possible use of CBD with Panic Disorder (PD), Obsessive-Compulsive Disorder (OCD), and Post Traumatic Stress Disorder (PTSD), and Bipolar Disorder.”
Blog Post	CBD for Psychosis vs CBD Oil for Schizophrenia: Breaking News...	“People are now taking CBD for anxiety, stress relief, proper pain medication, and to help fight addiction.”
Blog Post	CBD for Psychosis vs CBD Oil for Schizophrenia: Breaking News...	“High-level CBD can help manage symptoms of psychosis that come from schizophrenia.”
Blog Post	CBD Oil Benefits	“Relief for Chronic Pain . . . [t]hose who suffer from chronic pain from diseases such as fibromyalgia find relief in CBD. Taking CBD can relieve pain and even prevent the degeneration of the nervous system.”
Blog Post	CBD Oil Benefits	“IBD . . . [s]everal studies have suggested that one of the most important effects of CBD is that it may help patients with inflammatory bowel disease such as ulcerative colitis and Crohn’s disease.”
Blog Post	CBD Oil for Sundowning, Dementia, Alzheimer’s Disease & Disorientation	“The dementia-related conditions that can be helped by CBD Oil include Alzheimer’s disease, Vascular Dementia, Dementia with Lewy bodies (DLB), Parkinson’s disease, Frontotemporal dementia and Huntington’s disease.”
Blog Post	CBD Oil for Sundowning, Dementia, Alzheimer’s Disease & Disorientation	“CBD could help remove dementia from brain cells.”
Blog Post	Delta-8 THC: Discover This New Cannabinoid from Cannabis	“[D]elta-8-THC was administered to eight children being treated for hematologic cancers. The children were 3 to 13 years old . . . [t]hey all experienced vomiting because of the chemo . . . they received delta-8-THC with their chemotherapy treatments, every single child stopped vomiting during and after their chemo sessions!”
Blog Post	Delta-8 THC: Discover This New Cannabinoid from Cannabis	“[D]elta-8-THC has also been used to relieve pain, ease anxiety”
Blog Post	How Long Does It Take For Results Using CBD Oil To Take Affect With OCD?	“CBD oil is an effective natural treatment for OCD.”
Blog Post	How To Take CBD Oil For Crohn’s Disease? Finding The Right Dosage	“The study suggests that cbd oil or a derivative of it could be a useful treatment for Crohn’s.”
Blog Post	Is CBD Oil Good For Idiopathic Pulmonary Fibrosis? The Ultimate Therapeutic Guide	“[T]here are numerous studies that suggest CBD oil has the potential to treat a wide variety of health issues and could be effective in treating IPF [idiopathic pulmonary fibrosis].”
Product	Delta 8 Gummies	“Another benefit that many people don’t know is that Cannabidiol can help with the growth and healing of damaged tissue, and it can also help reduce chronic pain and the likelihood of developing certain cancers, such as breast and prostate.”
Product	Delta 8 Gummies	“The benefits of Delta 8 are the following . . . Reduce depression . . . Reduce anxiety and panic attacks . . .”

Product	CBD Pain Relief Cream	“bioMDplus Pain Cream in 500mg strength is a new formulated pain relief topical cream that made for use on sore muscle areas and areas where there is pain. bioMDplus Pain Cream infused with the Quality Full Spectrum CBD. bioMDplus CBD Cream provides effective, fast and long-lasting pain relief.”
Product	CBD Pain Relief Cream	“Begin by rubbing small amounts of CBD cream to the affected area and wait for about an hour. You can increase the quantity depending on how fast it works. If the effects of the cream are slow to kick in, then its [sic] recommended to re-apply CBD cream after every 3-4 hours. . . . Using CBD cream is like using a moisturizing lotion, but making sure to apply the optimal dosage of CBD cream isn’t easy. Users have to determine the milligrams of CBD in the cream and decide whether it’s good enough for pain relief. CBD creams with low amounts of CBD will probably be less useful than those with higher concentrations. Begin by using small amounts of CBD cream before slowly increasing it until you find relief. Moreover, applying CBD cream on the body isn’t known to produce any significant side effects.”
Product	CBD Pain Relief Cream	“CBD creams work when directly applied to the skin, which makes them an excellent alternative to traditional creams when it comes to pain relief. . . . For the most part, the effects of CBD cream can be felt 15-20 minutes and can keep working for as long as 6 hours or more.”
Product	CBD Pain Relief Cream	“Applying CBD-infused creams is generally a straightforward process. Look for the areas of your body most affected by pain and discomfort, and apply small amounts of CBD cream around those areas for local treatment. . . . Elbows, knees, and joint . . . Bottoms of the feet and impact points . . . Face, particularly around the temples and the nose . . . Neck and shoulders”
Social Media	Facebook	“Recent research has linked CBD with several benefits for the heart and circulatory system, including the ability to lower high blood pressure. High blood pressure is linked to higher risks of a number of health conditions, including stroke, heart attack, and metabolic syndrome.”
Social Media	Facebook	“500mg: CBD & Menthol Pain Cream . . . bioMDplus 500mg CBD Pain Cream is a newly formulated pain relief topical cream made to soothe sore muscles and alleviate chronic joint pain. Derived from our signature potent hemp oil infused with peppermint oil, eucalyptus oil, menthol and our signature terpene blend, this cream allows for a unique and STRONG combination of natural ingredients and CBD to aid in POWERFUL relief. You can use our new topical pain cream to FIGHT back against sore muscles and achy joints!”

Social Media	Facebook	"Just what does CBD do for the body and why are people so interested in this substance? . . . Pain relief from arthritis or inflammatory diseases . . . Treatment of insomnia . . . Lowering anxiety levels . . . May lower diabetes risk . . . Could lower levels of obesity"
Social Media	Twitter	"62% of CBD users used it to treat health conditions. The most common uses were for pain, anxiety and depression."
Social Media	Twitter	"CBD Oil for Depression, Anxiety, and Bipolar disorder."
Social Media	Instagram	"75% of PTSD patients saw a reduction in PTSD symptoms, when they were using CBD products compared to when they were not."
Social Media	Instagram	"A recent study showed that CBD administration can prevent the death of the neurons and reduce brain damage in the event of a stroke. CBD also reduced stroke-related seizures."

Blog Post	3 Reasons to Be Excited About CBD!	<ul style="list-style-type: none"> • “Cancer-Fighting Capabilities . . . recent studies have shown that CBD can act as a direct antitumor agent for a variety of aggressive cancers and can even prevent the spread of cancer cells in the body.”
Blog Post	3 Reasons to Be Excited About CBD!	<ul style="list-style-type: none"> • “Potential for Neurodegenerative Disorders and Brain Injury . . . CBD has various neuroprotective effects that have shown effectiveness against neural cell damage related to various neurodegenerative disorders such as Alzheimer’s. CBD consumption can limit or prevent the damage caused by the advancing disease and even slow down the progression of degenerative brain diseases. Studies are also being conducted to conclusively prove the benefit of administering CBD immediately after traumatic brain injuries or spinal cord injuries to prevent the release of harmful mediators that often lead to permanent brain damage in such scenarios.”
Blog Post	CBD Oil: Can It Treat Opioid Dependency?	<ul style="list-style-type: none"> • “CBD is being touted as a safer alternative to opioids in the market. Unlike opioids, CBD isn’t addictive and doesn’t have psychoactive properties. Preliminary studies show that CBD can reduce opioid cravings, and that it breaks the addiction cycle.”
Blog Post	CBD Oil: Can It Treat Opioid Dependency?	<ul style="list-style-type: none"> • “Seeing how CBD effectively manages pain, many healthcare providers have started recommending it to patients suffering from chronic pain and undergoing chemotherapy.”
Blog Post	CBD Oil: Can It Treat Opioid Dependency?	<ul style="list-style-type: none"> • “Prevents Relapse . . . According to preclinical studies, the therapeutic properties of CBD can reduce cravings for psychostimulants, opioids and hard drugs like cocaine. CBD also rewires the brain’s programming to lower the intensity of cravings, making it easier to break the opioid addiction.”

Blog Post	How CBD Can Help You Quit Smoking	"CBD can help you with smoking cessation. There's mounting evidence that suggests that CBD can decrease the urge to smoke, until it disappears altogether."
Blog Post	How CBD Can Help You Quit Smoking	"According to studies, CBD oil can help weaken habitual triggers and breaks the addictive association with time, allowing smokers to quit."
Blog Post	How CBD Can Help You Quit Smoking	"Preventing Relapse . . . While there still isn't enough research to confidently say that CBD oil can eliminate nicotine addiction, ongoing studies have proven that it can be used to prevent relapses when quitting cocaine and morphine."
Blog Post	How CBD Can Help You Quit Smoking	"Combating Nicotine Withdrawal . . . CBD triggers the release of serotonin by reacting with 5-HT1A receptors in the brain (just like antidepressants) and prevents anxiety, stress and moodiness caused by quitting smoking."
Blog Post	CBD Oil: Can it Help ADHD Patients?	"CBD is especially useful in releasing serotonin in the body to combat feelings of anxiety and stress. Increased levels of serotonin in the body help us feel more relaxed and boost concentration—this is why many patients believe CBD can treat ADHD."
Blog Post	CBD Oil: Can it Help ADHD Patients?	"CBD is a much safer alternative to conventional ADHD treatment. It's all-natural, and it reacts with our bodies' inbuilt receptors to promote optimal functionality."
Blog Post	Curing Insomnia with CBD	"Anxiety and insomnia go hand in hand. People who suffer from anxiety usually struggle with insomnia. Treating anxiety through therapy, medication, or CBD can help people sleep better."
Blog Post	What is CBD?	"At Rena's Organic, I want you to share with you the truth about CBD and its amazing properties. That's because I want you and your loved ones to have an alternative to risky and debilitating pills and opioids."
Blog Post	How to Use CBD to Combat Holiday Stress	"Reduced Anxiety and Depression . . . Studies show that cannabidiol has anxiolytic-like and anti-depressant-like effects, which can help reduce anxiety and depression in many people. While more research is required to prove the therapeutic effects of CBD, there are several studies that suggest that CBD can help alleviate some symptoms of depression and make the condition easier to manage."
Blog Post	Using CBD Oil for the Symptoms of Fibromyalgia	"CBD oil has helped countless patients gain relief from the debilitating symptoms of fibromyalgia."
Blog Post	Using CBD Oil for the Symptoms of Fibromyalgia	"According to a 2020 review, CBD oil has proven to . . . reduce inflammation, and relieve chronic pain. CBD also helps with . . . anxiety, which can keep people from achieving a state of complete rest."

Homepage	Forbes: Study Finds Cannabis Compounds Prevent Infection By Covid-19 Virus	<p>“Forbes: Study Finds Cannabis Compounds Prevent Infection By Covid-19 Virus Compounds in cannabis can prevent infection from the virus that causes Covid-19 by blocking its entry into cells, according to a study published this week by researchers affiliated with Oregon State University. A report on the research, ‘Cannabinoids Block Cellular Entry of SARS-CoV-2 and the Emerging Variants,’ was published online on Monday by the Journal of Natural Products. The researchers found that two cannabinoid acids commonly found in hemp varieties of cannabis, CBD, can bind to the spike protein of SARS-CoV-2, the virus that causes Covid-19. By binding to the spike protein, the compounds can prevent the virus from entering cells and causing infection, potentially offering new avenues to prevent and treat the disease.”</p>

Blog Post	Can Hemp Oil Combat Inflammation and Viruses?	“Hemp Oil has been shown to possibly reduce viral inflammation, known as a cytokines storm, which can be detrimental and even deadly to a person suffering from a viral infection, such as COVID-19.”
Blog Post	Can Hemp Oil Combat Inflammation and Viruses?	“Exciting Discoveries: CBD and COVID-19 Research released in May 2020 revealed fascinating findings about the potential effects of cannabis on the COVID-19 virus: ‘Similar to other respiratory pathogens, SARS-CoV2 (COVID-19) is transmitted through respiratory droplets, with potential for aerosol and contact spread . . . ACE2 levels were in fact significantly down-regulated when specific strains of cannabis were introduced, supporting their theory that the anti-inflammatory properties of CBD could inhibit the virus’s ability to successfully bind to a host. Cannabinoids may decrease the number of receptors available to the virus giving your body more of a chance to fight it.”

Blog Post	Does CBD Defend Against COVID?	At the University Of Chicago, a team led by Marsha Rosner discovered that CBD curbs COVID-19 cell infections in lab experiments. By using small doses of CBD (approximately what patients would receive in an oral drug), the team discovered that CBD didn’t stop the spread of COVID-19 in test tubes. Rather, it started acting as soon as the virus entered healthy cells, blocking it from making copies of itself, thanks to interferon (an inflammatory protein).
Blog Post	CBD, COVID and Epilepsy	“When the team studied adults with severe epilepsy, they realized that individuals on Epidiolex, a CBD-based medication, showed lower COVID-19 infection rates. . . . Another team from Oregon State University, led by Richard van Breeman, recently shared a report in the Journal of Natural Products. It stated that high doses of CBDA and CBG actually prevent coronavirus from breaking into cells.”

<p>Blog Post</p>	<p>3 CBDA Studies To Know Right Now</p>	<p>"A lab study in the Journal of Nature Products shows that cannabis compounds inhibit the COVID 19 virus from easily penetrating healthy human cells. Specifically, CBDA, and CBGA possess the ability to combat coronavirus. . . .</p> <p>Even better? Researchers examined the compounds' impact against the COVID's alpha and beta variants in a laboratory. And they proved effective. . . . lead researcher Richard van Breemen said that these compounds could prevent and even treat SARS-CoV-2 infections. And he suggested taking them orally, thanks to their extended history of safe application in humans. . . .</p> <p>You can enjoy the better-together benefits of CBDA and CBD in Tanasi's range of full-spectrum hemp extracts."</p>
<p>Blog Post</p>	<p>Cannabis and Covid: New Hope For Preventing Infections and Speeding Recovery</p>	<p>"In the new study, author Richard van Breemen reveals that cannabinoids can help prevent a Sars-Cov-2 infection., [sic] How does that work? It seems that they block Covid-19 from entering your healthy cells. And, while all cannabinoids may be useful, two offer the most protection: CBGA and CBDA. (Also known as cannabigerolic acid and cannabidiolic acid.)</p> <p>Now, if you're familiar with our Tanasi products, you probably know that these two compounds have many potential therapeutic properties. But now, with this study, we've learned that they may fight COVID by binding to the virus' spike proteins. In turn, this makes it harder for Covid to force its way into your body's healthy cells, possibly preventing infection.</p> <p>Already, that's pretty exciting news. And it keeps getting better, because the cannabinoids seem to work against several Covid variants."</p>
<p>Blog Post</p>	<p>Cannabis and COVID: How Cannabinoids Fuel Recovery from Infection</p>	<p>After announcing his new findings, van Breemen also said that cannabinoids 'have the potential to prevent as well as treat infection by SARS-CoV-2.'"</p>

Blog Post	What Is Dexamethasone?	Dexamethasone has recently emerged as the best drug to treat severe life-threatening cases of Coronavirus Disease 2019 (COVID-19). . . . Dexamethasone is a synthetic corticosteroid that is used as an anti-inflammatory or immunosuppressant agent. . . .
Blog Post	What Are the Anti-Inflammatory Effects of Cannabinoids?	GreenWay Tanasi, LLC, and its brand, Tanasi, a subsidiary of GreenWay Herbal Products, LLC, sells a number of cannabidiol (CBD) products that feature a unique patent-pending blend of cannabinoids (CBD and Cannabidiolic-acid (CBDA)) extracted from Cannabis Sativa L. hemp plants. GreenWay Herbal Products, LLC developed this patent-pending technology with a university partner, which has demonstrated that cannabinoids are natural anti-inflammatory agents that can suppress cytokine storms. In direct comparison studies, the unique formulation of cannabinoids used in the Tanasi CBD product line was as effective as dexamethasone in reducing cytokine storms. Thus [sic] it is not surprising that customers using the Tanasi CBD/CBDA products report that they are very effective at reducing a number of inflammatory conditions. See the customer reviews at www.tanasi.com . Tanasi is not recommending using its CBD/CBDA patent-pending formula as a treatment for COVID-19.”

Blog Post	HEMP-DERIVED CBD TO BE USED AS A CORONAVIRUS TREATMENT? LATEST RESEARCH GIVES SCIENTISTS HOPE	"As researchers the world over race to develop curative vaccines, and doctors across the country struggle to find effective treatments for symptoms, others are studying a more natural source to combat the effects of the coronavirus: cannabidiol (CBD) from the hemp plant. Scientists in the United States and Canada are unearthing growing evidence that cannabidiol — already a popular alternative for many facing maladies such as anxiety or chronic pain — may have a role to play in the treatment of COVID-19, the disease caused by SARS-CoV-2, 'the coronavirus.' There's hope that CBD (likely in partnership with other naturally occurring compounds in hemp), could deny the coronavirus the entryway it uses to connect to cells, fight lung inflammation, or even prevent the potentially deadly 'cytokine storm' in which a patient's immune system goes haywire."
